## **BEST AVAILABLE IMAGES**

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images may include (but are not limited to):

- BLACK BORDERS
- TEXT CUT OFF AT TOP, BOTTOM OR SIDES
- FADED TEXT
- ILLEGIBLE TEXT
- SKEWED/SLANTED IMAGES
- COLORED PHOTOS
- BLACK OR VERY BLACK AND WHITE DARK PHOTOS
- GRAY SCALE DOCUMENTS

## IMAGES ARE BEST AVAILABLE COPY.

As rescanning documents will not correct images, please do not report the images to the Image Problem Mailbox.

Ko-Fang Chang, Reg No. 50,829, (650) 326-2400
Atty. Docket: 21795-000210US
Title: Method And Apparatus For Improved High-Speed Fec Adaptive Equalization
Applicant: John S. Wang et al.
Sheet 1 of 22

FIG. 1 (Prior Art)

FIG. 2a (Prior Art)

Atty. Docket: 21795-000210US

FIG. 5

Ko-rang Chang, Keg No. 50,829, (650) 326-2400
Atty. Docket: 21795-000210US
Title: Method And Apparatus For Improved High-Speed Fec Adaptive Equalization
Applicant: John S. Wang et al.

Sheet 4 of 22

**FIG.** 6

Ko-Fang Chang, Keg No. 50,829, (650) 326-2400

Atty. Docket: 21795-000210US

Title: Method And Apparatus For Improved High-Speed Fec Adaptive Equalization Applicant: John S. Wang et al.

Sheet5of 22

Optionally, the process begins when one or more control algorithms are activated or selected (Step 400).

Optionally, the process continues when one or more controllable analog filters are initialized (Step 410).

One or more data signal inputs are received by one or more controllable analog filters (Step 420).

One or more controllable analog filters filter one or more input data signals (Step 430).

One or more filtered data signals are carried on one or more controllable analog filter outputs (Step 440).

FIG. 7a

Ko-rang Chang, Keg No. 50,829, (650) 326-2400

Atty. Docket: 21795-000210US

Title: Method And Apparatus For Improved High-Speed Fec Adaptive Equalization Applicant: John S. Wang et al.

Sheet 6 of 22

Preferably, one or more error generators receive filtered data signal output signals (Step 450).

Preferably, an error generator may assess the performance of one or more analog filters according to one or more error functions and generate one or more error generator output signals (Step 460).

Preferably, error generator output signals are further processed (Step 470).

Preferably, one or more equalizer controllers receives one or more processed signals (Step 480).

The equalizer controller may compute a new set of coefficients according to one or more error minimization algorithms (Step 490).

FIG. 7b

Ko-rang Chang, Keg No. 50,829, (650) 326-2400
Atty. Docket: 21795-000210US

Title: Method And Apparatus For Improved High-Speed Fec Adaptive Equalization Applicant: John S. Wang et al. Sheet 7 of 22

One or more equalizer controllers control the controllable analog filter by providing control signal inputs that are used to change controllable analog filter coefficients (Step 500).

Optionally, iterate one or more times by returning to Step 420 (Step 510).

FIG. 7c

### Ko-rang Chang, Keg No. 50,829, (650) 326-2400 Atty. Docket: 21795-000210US

Title: Method And Apparatus For Improved High-Speed Fec Adaptive Equalization Applicant: John S. Wang et al.

Sheet 8 of 22

FIG. 8a

## Ko-rang Chang, Reg No. 50,829, (650) 326-2400 Atty. Docket: 21795-000210US

Title: Method And Apparatus For Improved High-Speed Fec Adaptive Equalization Applicant: John S. Wang et al. Sheet 9 of 22

Compute the gradient vector. (Step 650). Perform a line search to find the value of t that minimizes the error signal for coefficient values [c(1) c(2) ... c(N)] - t \* [g(1)] $g(2) \dots g(N)$  for  $t \ge 0$ . The notation  $[c(1) c(2) \dots c(N)]$  denotes the N-dimensional vector whose i'th component is c(i) (Step 660). Validate results and discard invalid results (Step 665). Set the coefficients for the controllable analog filter to: to  $[c(1) c(2) ... c(N)] = [c(1) c(2) ... c(N)] - t_{min} * [g(1) g(2) ...$ g(N)], where tmin is the value of t determined according to the line search executed in Step 660 (Step 670). Optionally, return to Step 610 (Step 680).
